

I have been a Police Officer for 30 years and have every night continually interrupted by unwanted telemarketers, most of which were extremely rude and continued to call over and over. Since Indiana has established the "No Call" list, my family has finally enjoyed peace in our home. Please don't change Indiana's No Call List for unwanted telemarketers.

PS Our business line at the Butler Police Department was also hounded by telemarketers to the point that on some days, it was difficult to conduct business, it was put on the no call list and it is so nice to work hassle free. Remember, this is the only business line at a Police Department, telemarketers didnt care, they just tied it up all the time. People have the right to live and work free from HARRASSMENT. Telemarketers do not have the right to use communication devices to Harrass the people of this country, let alone a Emergency Service Agency. Anyone who wants to do business with them can contact them.

Thank You
